## 👤 PROFILE

I am **Abdul Majid**, a Software Engineer with 3.5 years of experience specializing in **Magento 2**, **MERN** stack, and **React Native**. Known for exceptional debugging skills and a solution-oriented mindset, I excel in developing efficient, scalable applications that enhance both functionality and user experience. My ability to identify issues swiftly and implement effective solutions ensures seamless project execution and optimized performance. As a visual learner, I bring my **technical expertise** and **problem-solving** abilities to innovative projects that prioritize **quality** and collaboration.

## 🎓 EDUCATION

### Bachelor of Software Engineering (BSSE)

09/2019 – 07/2023 | Lahore, Pakistan

COMSATS University Islamabad (CUI) 🌐

Graduated with a commendable CGPA of 3.31 out of 4, placing in the **top 3** of my batch, reflecting my strong academic dedication and achievement.

## 📜 CERTIFICATES

### Adobe Certified Expert - Adobe Commerce Developer —

## 👔 PROFESSIONAL EXPERIENCE

### Senior Magento 2 Developer

02/2022 – 01/2025

@ *Pointeger* 🌐

full time - onsite | Lahore, Pakistan

In this experience, I worked on various **Magento 2 projects** across Community, Enterprise, and Magento Cloud versions. My role involved building **high-quality** and **scalable** e-commerce solutions and providing immediate fixes to critical bugs. Additionally, I managed teams, resolved complex development problems, collaborated with team members, and communicated with clients for requirement gathering. During this time, I achieved significant milestones, consistently **delivering 100% of projects** with high **quality** and client **satisfaction**.

Here are some of my major projects:

- **Larkbury London** | Home interior and furniture Store
- **katieloxton, jomajewellery** | Fashion Jewellery Store
- **The Hummingbird Bakery** | Bakery Store
- **Kids Toys 4u** | Toys Store, **Biocare** | Pharmacy Store, **DJI Drones** Kuwait | Drones Store
- **Rose Uniacke** | Home decor, furniture, and paint Store
- **Chanel** (staff site) | Fashion & Accessories, Fine Jewellery & Watches Store
- **Create Vet Compounding** | Pharmacy Store

For more details about these projects, please check the project list.

### Sr. Mobile and Web Developer | FOMO

04/2024 – 01/2025

@ *Fomo* 🌐

contract - remote | Puerto Rico, United State

In this experience, my role was to create and maintain a **social networking app** called Fomo from start to finish. The app was designed specifically for **university students** and included key features such as:

- Full authentication and authorization - State management using Redux

- **Chatting module** with image and location sharing - Push notifications - **Poke** system- **Friends** system
  - **Daily reset** system - Deployment on both the App Store and Play Store
  - Web application in Nextjs - Web Admin Dashboard - Web admin email marketing page.
- In summary, it was a comprehensive social networking app for university students.

Technologies used:

- Frontend: Expo SDK 51 and 52, Redux, Next.js
  - Backend: Firebase, Google Cloud Functions (for cron jobs), Next.js, Vercel
- For more project details, please refer to the Fomo entry in your project list.

### React Native Developer

10/2022 – 12/2022 | Lahore, Pakistan

@ LetTechnologies 

In this experience, I worked on a **Messaging App** developed in React Native, designed to help people communicate in **different languages**. My role involved integrating **backend APIs** with the frontend, handling the UI, and creating a **full authentication and authorization system**. I managed state using Redux. Some of the key features include:

- Users can send **text messages**, with receivers getting them in their own language.
- Users can send **audio messages**, with receivers receiving the audio in their own language and in text format.
- Users can **change the language** in real-time to view messages in different languages.

Technologies and tasks I focused on included:

- Custom implementation of authentication and authorization - React hooks - Custom API hooks
- State management - Notifications - Callbacks - Promises - API integration - Designing responsive interfaces

### Web Developer Internee

06/2021 – 09/2021 | Lahore, Pakistan

@ Magement 

In this experience, I gained hands-on knowledge in web development, working with both frontend and backend technologies. I built a basic full-stack application featuring **CRUD** operations using **AJAX** requests.

Technologies used:

- **Backend:** PHP, MySQL
- **Frontend:** HTML, CSS, JavaScript, jQuery, Axios

## PROFESSIONAL TECHNOLOGIES AND SKILLS

Magento 2, Hyva, PHP, Laravel, Javascript, Jquery, css, tailwind, less, sass, React (MERN), React Native, Next js, Debugging | code refactoring and cleanup, Database | Mysql, Mongodb, Firebase, Mobile App Development, Fullstack development | MERN, Git | Github | Bitbucket, APIs, Docker

## FEATURED PROJECTS

### Larkbury London

07/2022 – 11/2024

Magento 2

As a senior Magento developer, I serve as the core developer from the initial stages of a project through to its completion. I have worked on many customizations in Magento's normal workflow to address clients' specific needs. Some features include:

- Reduced page **load time by 50%** by implementing lazy loading on customised upsell sliders.
- Built a custom advanced Larkbury **product slider widget** that can be used independently or for upsell, rule-based upsell, related, and rule-based related products.
- Developed a **custom indexer** to push custom data into **Elasticsearch** and prepare Data for **CLP**.
- Manipulated Elasticsearch data for **layered navigation filters**.
- Created a **custom widget** capable of **cloning simple products as configurable products**.
- Replicated the **full login process for B2B customers**, automatically creating a company and assigning the customer as the admin.
- Replicated the **full quote and cart process** for the **enquiry feature**, allowing users to inquire about any product and **add or remove products from the enquiry cart**. This feature includes **admin-side emailing and response capabilities**.
- Modified admin forms and **grids** to include **salesperson** information, as well as other company, customer, and order data.
- Customized the product **loading process on the PDP** to load configurable products based on a simple product URL.
- Adjusted layered navigation filters based on applied filters and conditionally rendered products based on custom attributes.
- Set up a **cron job** to allow **categories to merchandise** with the "**match products by rule**" option.
- Resolved countless bugs.

## Materializer [🔗](#)

05/2022 – 04/2023

MERN | Low Code Ultimate Website Builder

Develop a platform to streamline website building with a focus on ease of use and scalability.

- **Drag-and-Drop Interface:** Enables users to design stunning and interactive frontend pages using React components.
- **Visual Backend Development:** Allows for development of scalable, headless systems using a graphic interface, reducing the need for extensive coding knowledge.
- **Media Uploader:** Organize your media assets alongside projects for seamless use in your designs.
- **FREE Unlimited Projects Downloads:** Users can create unlimited projects and download them with a single click.

## Katieloxton, Jomajewellery and The Hummingbird Bakery

10/2024 – 01/2025

Magento 2 | Hyva

Katieloxton [🔗](#), Jomajewellery [🔗](#) and The Hummingbird Bakery

Worked on many advanced subjects, such as:

- Custom **page builder components** development in **Magento**.
- Migrate Complexly build pal builder to Hyva. Integrate and migrate pal with bundle products.
- Developed custom **Page builder components** in **Hyvä**.
- Created pixel-perfect page designs along with custom widgets.
- Added features and fixed bugs in advanced and **custom product types**, allowing users to **customize products** with **pal builder**.
- Implemented **PixiJS** for custom products and resolved many errors.
- Customized the **checkout** process in **Hyvä**.
- Migrated one full website from **Magento to Hyvä** and built another website from scratch in Hyvä, with numerous customizations in the normal flow.

## Fomo [🔗](#)

04/2024 – 12/2024

React Native | Social Network for University Students

- Developed the **entire app** from initial concept to full deployment, handling all aspects from A to Z.
- Implemented a **Poke System** requiring users to engage with a poke to initiate chats.
- Built a **robust Chat System** that includes text, image, and location sharing capabilities.
- Introduced a **QuickAdd Search** Feature to enhance user connectivity and network expansion.
- **Chatting module** with image and location sharing - Push notifications - **Friends** system
- **Admin dashbord** on webapp in Nextjs.  
**ios:** <https://apps.apple.com/us/app/fomo-see-whos-going-out-tn/id6505008221> [🔗](#)  
**android:** <https://play.google.com/store/apps/details?id=com.obra.fomo> [🔗](#)

## Kids Toys 4u

09/2023 – 01/2024

Magento 2 | e-commerce shop for kids toys

- **Custom CLP**(category listing page) Page
- Build whole **new Customer dashbord** for retail Customer with **custom notification** and profile settings and other pages.
- Integrate **Knet payment gateway**- Integrate Kawait **sms gateway** for sending OTP for login and registration.
- Customise checkout fields
- Customise **18 amasty** extension to **make compatible** with our custom customer dashboard.
- Build a Completed **Community Feature** in which there are following features ( customer can **ask question**, customer can **answers questions**, admin **post topics** , customer can **answer topics**, customer become **consultants**, consultant can **post blogs** , customer can **chat with consultant** , consultant can **reply chat**, customer can **mark fav to question, answer, blog** and **consultant**, Customer Also received all type of **Notifications** All above functionalities can **edit, update, delete** by author, Also **Admin** have functionality to view, approve , disapprove , delete all these functionalities.

## Be Productive

Javascript | Google chrome extension

- Developed a **Google Chrome extension** designed to enhance productivity by **blocking time-consuming social media activities** such as **Shorts** and **Reels**.
- Implemented **local storage** to save user preferences for blocking specific sites or types of content.
- Replaced content on restricted pages with the message "**Be productive,**" to encourage users to **stay focused**.
- Added a **redirect** feature to automatically navigate users to xyz.com if they attempt to visit restricted pages like youtube.com/shorts.
